

STOP GLOBE VALVE ACID-PROOF WITH BELLOWS TYPE ZYMA40

CHARACTERISTIC:

- Diameter - 15 -200 mm;
- Pressure - 40 bar (flanged may be drilled for 6, 10, 16, 25, bar);
- Temperature - up to 250°C for acids, bases and other aggressive media;
- up to 550°C for non-toxic media; (with PTFE sealing up to 200°C);
- Medium - acids, liquors, water, steam and other non-toxic and non aggressive liquid and gas media, engine fuel.

VERSIONS : type body material / ends / disc and disc rings / others

Example: ZYMA40 / --- / --- / ---

Example: ZYMB40 / S / P / ---

Type - body material	Sign	Ends	Sign	Disc and disc rings	Sign	Others	Sign
X6CrNi18-10 or GX5CrNi19-10	ZYMA40	Standard - flanged	---	Standard	---	-----	---
X2CrNiMo17-12-2 or GX5CrNiMo19-11-2	ZYMB40	Butt weld ends	S	PTFE ring	P		
		Socket weld	SW	NBR ring	N		
				Rubber ring	G		

APPLICATION:

Stop globe valve is designed to open and stop the flow. The valve is not supposed to be used as a regulating device. For regulation the version „R” with throttling plug should be applied.

DN 15 ÷ 200

Equilibrating disc
DN 125-300

Rubber disc
T_{max} 120°C

With PTFE, NBR
ring T_{max} 200°C

"SW"

MOUNTING AND OPERATING:

The valve can only be mounted and operated by skilled, properly trained and qualified personnel. Incorrect assembly or operation of the valve may have substantial impact on the entire system such as fluid leakage, reduction in system's function etc.

Before a valve is installed the pipeline must be clean from any mechanical impurities. The compatibility of critical parameters of the flow must be checked with the parameters of the valve. Stop globe valve can be mounted to a pipe-line in any position. The direction of flow should only comply with the arrow marked on the body. The valve should be operated strictly with its assign. In order to provide valve's reliability the following suggestions must be observed:

- medium flowing through the valve is supposed to be clean out of any mechanical impurities;
- the valve must be protected from any mechanical damages during its work;
- nominal parameters marked on the valve and in its passport must be observed.
